

Oxypot XL / V6 Instructions

Components	Oxypot XL	Oxypot V6
Tank	1	1
Lid	1	1
Basket	2	6
Cap	2	1
Air Stone	2	2
Air Pump	1	1
1.5m Air line tube	2	2

Instructions:

1. Connect the air line tubes to the air stones and place the air stones in the recesses in the base of the tank
2. Place the lid on to the tank so that the air lines run through the spaces provided
3. Connect the 2 air lines to the air pump
4. Place the basket(s) in position
5. To use one hole as an access point, simply cover with the cap provided

Handy Tip

Reverse your lid, lowering plants further into nutrient solution, whilst roots establish.
